

A close-up photograph of a microchip manufacturing process. A golden-colored probe or tool is positioned over a grid of small, dark square components on a blue substrate. The lighting is dramatic, with a strong blue hue and highlights on the metallic parts.

Positioned for **sustainable growth**

Who we are

TT electronics is a focused, global electronics group supplying leading manufacturers in the defence, aerospace, medical, automotive and industrial electronics markets.

Our development of new technologies is based on understanding our customers' needs and providing innovative solutions to meet them.

Designed and produced by **Radley Yeldar** (www.ry.com) using the paperless proofing system Wizardry.

TT electronics plc are committed to caring for the environment and looking for sustainable ways to minimise our impact on it.

We take care to minimise the impact on the environment in the paper we use. The paper we have chosen:

- contains material sourced from responsibly managed forests, certified in accordance with the FSC (Forest Stewardship Council)
- is manufactured under strict environmental management systems, the international ISO 14001 standard, EMAS (Eco-Management & Audit Scheme) and the IPPC (Integrated Pollution Prevention and Control) regulation.

FSC – Forest Stewardship Council. This ensures there is an audited chain of custody from the tree in the well-managed forest through to the finished document in the printing factory.

ISO 14001 – A pattern of control for an environmental management system against which an organisation can be credited by a third party.
